TIPS :

You cannot reset Global Perks, even if you regenerate the shard, as they are permanently saved in the shard file. To reset them, you must create a new save.
However, you can edit or delete the `chasni_perk_global.json` file in your world save folder to reset or modify perks. This file is located at:
`<cluster_folder>/<Shard_Name>/save/chasni_perk_global.json`
Modifying this file can also allow you to cheat and obtain any Global Perk for free (do it at your own risk).
