- The world behaves as if rifts are open.
- Can be toggled off by clicking again (when toggled off, the world behaves as if no rifts are open, even if they are).

TIPS :

You cannot reset Global Perks, even if you regenerate the shard, as they are permanently saved in the shard file. To reset them, you must create a new save.

However, you can edit or delete the `chasni_perk_global.json` file in your world save folder to reset or modify perks. This file is located at: `<cluster_folder>/<Shard_Name>/save/chasni_perk_global.json`. Modifying this file can also allow you to cheat and obtain any Global Perk for free (do it at your own risk).
